

Pretend that you have been invited to a party in a room shaped like the diagram. Imagine, if you will, that you see six different groups of people, each clustered in a different corner of the room. You are told that each group is different. Read the descriptions listed for each group stated in each corner of the room and then follow the steps on the right

Students interested in specific majors should meet with a counselor to discuss what lower division major requirements can be met at Skyline College before transfer. Contact the Counseling Division at (650) 738-4317 to make an appointment.

Step 1: Which corner of the room would you first be drawn to, as the group of people you would most enjoy being with for the longest time? (Leave aside any question of shyness or whether you would have to talk to them) Write the letter for that group (R, I, A, S, E, or C) in Box 1 then go to Step 2.

Box 1

Step 2: After 15 minutes, everyone in your first corner leaves the room, except for you. Of the 5 remaining groups, which would you be drawn to next? (Leave aside any question of shyness or whether you would have to talk to them) Write the letter for that group in Box 2 and move on to Step 3.

Box 2

Step 3: After 15 minutes, everyone in your next corner leaves the room except for you. Of the 4 remaining groups, which would you be drawn to next? (Leave aside any question of shyness or whether you would have to talk to them) Write the letter for that group in Box 3 and move on to Step 4.

Box 3

Step 4: Choosing a Major—To locate the possible major(s) at Skyline College that reflect your interests, follow this example: If your areas of interests were “R, C, and I” turn to the reverse side and look first at the “R-Realistic” category and see what majors are listed under that heading. Since most people have several interests, look at the “C” and “I” categories for any other combinations of the letters you chose.

Now do the same with the letters you selected and then go Step 5.

Step 5: Meeting with a Counselor—Once you have reviewed the reverse side and have found some majors that fit your interests, list them below with their theme codes:
