

Skyline College Enrollment Counts by City of Residence 1998/99 to 2007/08

Summary: The data below illustrate the enrollment trend for the past ten years by city of residence at Skyline College. Enrollment has steadily increased from these areas over time, generally peaking in 2002/03, but showing slight dip since, reflecting the pattern in overall enrollment at Skyline. Increased enrollment at Skyline in 2002/03 may in part be a reflection of an increase in course offerings that academic year. Similarly, decreased enrollment in 2003/04 and 2004/05 may be in part be a reflection of increases in tuition for both years. Geographic participation can be summarized by three groups. San Francisco has consistently shown the highest participation, followed closely by Daily City/Colma area. In 2007/08, however, Daily City/Colma has higher enrollment count than San Francisco. Next highest were three cities located in close proximity to the campus (South San Francisco, Pacifica, and San Bruno), and students from outside the service areas. Lowest participation within the service area has been from San Mateo, Burlingame/Hillsborough, and Brisbane, which are cities that are either located further from campus or have a very small population.
