### Questions collected from Campus:

1. What happened to Ron Galatolo? Who, what, where, why and How? How does this impact the District?
2. Board creates position for Chancellor at \$400K and we cancel classes? WTF?

3. Give us SMCCCD version of lawsuit? Who are affected?

4. How can you justify an emeritus chancellor salary—an amount of \$ that can run a department, including salaries and benefits?

5. Is this investigation also related an interim president appointed who has no vote of confidence from her original district?

6. I'm sad and angry reading the comments about our college in the Palo Alto post. I wish I could say that none of this was true but I've just seen too much. In the few years things have gotten really bad here. As an adjunct, I never felt close to the college but now I feel basically worthless. We get pressured to follow everything the administration says and are almost brainwashed into believing the equity will somehow solve all problems. We don't get pay for most meetings or trainings and then we get blamed for not knowing what is going on. When Dr. Perkins was the vice president and we had a different dean, it did not feel like this. I hope someone actually cares about what goes on here.

7. What are the conditions of the former chancellor's emeritus position? Will he continue to draw his \$500,000 salary in perpetuity? Will his contract be cancelled if he is found guilty of crimes associated with the district?
